A PROMISE DELIVERED

# RELYANT SPRAY FOAM INSULATION SERVICES

RELYANT provides a critical “force multiplier” and “risk mitigation” tool for the US defense and NATO forward deployed assets in Afghanistan with spray foam insulation for canvas tents and other soft skin facilities. RELYANT has invested heavily in personnel, equipment and materials for implementing and sustaining the Afghanistan Spray Foam Project (ASIP). This investment is in theater to fully support the commanders on the ground with adhering to the requirements to reduce the use of fuel for cooling and heating facilities.

## Proven Value to the Forward Deployed Units

Spray foam insulation has proven over time to successfully reduce the need for fuel to run A/C and heating systems. It has shown a greater increase in the comfort of troops by maintaining consistent living and working environments. The GAO and the Department of Defense have tasked the forward deployed commanders to implement power conservation and reduce the need for fuel usage in non-combat activities. The key is a robust supply chain.

## SPRAY FOAM TECHNOLOGY FACTS

- Spray Foam is a chemical application applied to tents and other soft skin facilities for insulation and UV protection that reduces the fuel consumption needs by 75% to 90%.
- It is a Force Multiplier
- It reduces risk to the supply chain
- Spray Foam Insulation is an innovative and cost effective power saving solution
- Added insulation to tents and other soft skin structures such as DFAC, maintenance facilities, command TOCs, and medical and lodging tents reduces the fuel to run A/C
- Reduces fuel consumption in theater while increasing soldier comfort and integrity of buildings or tents

## RELYANT SPRAY FOAM EXPERTISE

RELYANT is contracted in Afghanistan under the ASIP contract vehicle to provide spray foam insulation in RC South and RC North. We have developed a robust supply chain that allows for delivery of product within 30 to 45 days cradle to grave. RELYANT uses only a US Army environmentally approved Gaco Western Polyfoam System 193 that contains non-ozone depleting chemicals.

## SCALABLE FOR MAKING IT HAPPEN

RELYANT has forward positioned our spray foam “fly away” kits that contain all necessary tools to conduct spray foam operations. Immediate mobilization is possible by adding additional trained personnel and consumable materials. RELYANT can quickly scale up current assets within the country to meet your needs. Our spray foam capability is perfectly suited to supporting LOGCAP IV and other contingency contract vehicles.

## CONTACT RELYANT

Please contact RELYANT should you have any questions or concerns. We are more than happy to visit with you at your convenience. RELYANT can provide your organization or agency with a written quote for any services you may require.
